

PPP Task Force for Aquaculture and Fisheries (PPP Fish)

The PPP Fish includes:

- Task Force leaders:
 - Vietnam Directorate of Fisheries (D-Fish)
 - Vietnam Association for Seafood Exporters and Producers (VASEP)
 - IDH, The Sustainable Trade Initiative
- Other Task Force members:
 - Vietnam Fisheries Society (VINAFFIS)
 - Vietnam Institute for Fisheries Economics and Planning (VIFEP)
 - World Wildlife Fund Vietnam (WWF VN)
 - Deutsche Gesellschaft für Internationale Zusammenarbeit GmbH (GIZ)

PPP Fish: Objective and Strategy

Via strong collaboration between the Taskforce members, the PPP Fish aims at better alignment and coordination of public-private resources to address key sustainability issues of the sector.

The key objectives in 2019-2020:

- Support the sustainable and efficient production of Aquaculture
- Support sustainable value chains and market requirements compliance
- Strengthen PPP collaboration in aquaculture and fisheries sector

PPP Fish Key activities

Objective 1: Support the sustainable and efficient production of Aquaculture

- Strengthening public and private sector collaboration in environmental monitoring and disease control and management in aquaculture
- Improving the quality and the productivity of aquaculture production through better management of feed, seed and antibiotics
- Improving efficient uses of natural resources in shrimp aquaculture, contributing to the reduction of production costs and pollutant discharges.
- Improving shrimp productivity of improved extensive shrimp aquacultures, and mangrove ecosystem cover and function
- Improve water quality for shrimp ponds
- Identify the technology improvement for shrimp sector

PPP Fish Key activities

Objective 2: Support sustainable value chains and market requirements compliance

- Conduct Service Delivery Models (SDM) to provide better and more efficient service to farmers
- Establishing and strengthening shrimp supply chain from production to processor and international buyers.
- Promote Sustainable Development of Large-scale Mariculture in Vietnam
- Improve shrimp production through innovative farming system
- Strengthening the traceability system for shrimp and pangasius production

PPP Fish Key activities

Objective 3: Strengthening PPP collaboration in aquaculture and fisheries sector

- Organize biannual PPP TF meetings
- Organize Aquaculture Roundtable (ARD) dialogues with the participation of private companies, farmers representatives, central and local government, research institutes and other relevant stakeholders to discuss and address - selected priority topics

Recommendation and Request (MARD) to support

- Support the approval and provide technical expertise to implement PPP projects
- Support the replication and upscale of successful models under PPP projects
- Acknowledge the results and recommendations related to public policy/strategies/regulations
- Integrate other funds to participate in PPP activities
